

SCI 199Y: MID-YEAR ANONYMOUS STUDENT FEEDBACK FORM

Please spend about 15 minutes providing anonymous feedback about your experiences so far in SCI 199Y, and about your hopes for the second half of the course. Specific questions you may wish to consider include: What did you think of the assigned readings? of the class discussions? of the mathematical exercises? Do you think the class has been well organized? well run? Do you have any suggestions? Also, please tell me what topics you have found particularly interesting, and what topics you would like to explore further next semester. (I already have certain items planned, including: gender and race issues; public perception of mathematics; more psychology readings; further questions about random walks; etc. But you can influence the choice of additional topics.)

You may continue on the back of the page if necessary.
